Thomas Couderc

Senior Fullstack Developer

Summary

I am an agile fullstack consultant passionate about open source frontend and backend technologies. I like to develop software using cloud solutions, all in line with the Devops movement.

Agile

I know how to use my multiple experiences of agility in the service of a team in order to achieve a product close to the need with a software craftsmanship philosophy.

scrum | safe | scrum master | kanban | lean

Dev

I like to develop reusable components in a clustered environment using concepts like microservices, robustness, observability, clean code.

java | typescript | react | ddd | architecture

Ops

I want to collaborate with operational teams by practicing continuous deployment and thus produce value for the company by reducing organizational friction.

docker | kubernetes | terraform | aws | helm

Job fit

Master's-level — Backed by 20 years of professional experience

Java 10 years — BlaBlaCar, SNCF Réseaux - DGEX Solutions, RelevanC, Ecocea, Edelia, JCDecaux, Lotsys Filiale FDJ, Mediametrie, Thales communications, Médiapost

JavaScript 7 years — Solopreneur, JPB Système, BlaBlaCar, SNCF Réseaux - DGEX Solutions, Celsius Energy, Ecocea

Professional Experience

Solopreneur

01/2023

Solopreneur · side projects

@home · home office

Building and shipping B2B and B2C digital products end to end—from ideation through production launch and operations.

- multi.app — control softwares with midi, osc, webhooks by motion
- City Guided — connected city guide.
- Up next: Shopify assistant, Livestreamz, Jober, Cop1, Realizator, Okascore, …

react | typescript | postgresql | llm | matière web

JPB Système

06/2024 - 08/2025

IOT Developer

Montereau-sur-le-Jard

Full-stack development on Keyvibe, Keyprod's industrial IoT hardware product

- Keyvibe – Developed key features for industrial IoT solution
- Designed and implemented a multi-threshold production detection system on Raspberry Pi 3 & 4, leveraging Python and Node.js to monitor machine operational states in real time.
- Fully integrated Ethernet connectivity, configuring DHCPD and enabling MQTT communication to AWS IoT Core & AWS Lambda, ensuring reliable, low-latency, and scalable data transfer.

vue.js | typescript | python | aws | aws lambda | iot hub | postgresql

BlaBlaCar

10/2023 - 12/2023

Full Stack Consultant

Paris

Add new cash refund application module for operated buses

- Create a new Spring boot Java service
- Add a new Zendesk refund application tab using React

react | spring boot | postgresql | kubernetes

Smartch

05/2023 - 09/2023

Backend Consultant

Paris

Kotlin backend for a SaaS e-learning startup: Ktor, GraphQL, fast-paced remote Scrum.

- GraphQL API, Ktor, Exposed (PostgreSQL)
- Hexagonal architecture and advanced patterns
- Fully remote Scrum, CI/CD (Jira / Confluence)

kotlin | ktor | exposed | postgresql | hexagonal architecture | confluence | jira

SNCF Réseaux - DGEX Solutions

05/2022 - 02/2023

System architect

Saint-Denis

Management of the quality of deliverables and continuous improvement within the framework of the SAFe methodology.

- SAFe
- Opensource
- Railway
- Management of the transverse technical backlog

safe | rust | java 17 | typescript | node.js | python | github | kubernetes | vscode | debian

leboncoin

08/2021 - 05/2022

Backend Consultant

Paris

Participation in the full redesign of the payment system and in the design of a wallet project

- hexagonal architecture with monorepo
- event driven architecture
- production monitoring

go | kafka | postgresql | gitlab | vscode | kubernetes | docker | debian | elk | datadog

Celsius Energy

12/2020 - 08/2021

Full Stack Consultant

Clamart

End-to-end design and development of the information system: a full monitoring application for heat-pump geothermal heating in large buildings.

- contributed in designing scalable architecture for realtime dashboards to monitor IoT devices
- used Scrum team specific implementation as Agile methodology
- automated builds and deployments with unit, integration and e2e tests

typescript | python | postgresql | angular | azure | terraform | iot hub | iot edge | stream analytics | function app

RelevanC

08/2020 - 12/2020

Full Stack Consultant

Paris

Initialization of the redesign of the Coupilo multitenant couponing tool

- Hexagonal architecture
- scrum

java 11 | spring boot | postgresql | swagger | postman | jhipster | gcp

Ecocea

10/2019 - 05/2020

Devops Consultant

Paris

Transformation of the software factory for the Manutan ecommerce website.

java 8 | gitlab flow | jenkins | gitlab | websphere commerce | ubuntu | react | gradle

Edelia

04/2016 - 06/2019

Full Stack Consultant

Nanterre

Design and development of systems and applications related to the consumption of electricity, water and gas.

- Design and development of a calculation backend solution for Sowee connected thermostats
- Participation in the digital transformation project on the Devops part
- Fullstack design and development of the My Eco Service hybrid mobile application

java 8 | java 11 | docker | docker-compose | rancher | openshift | kubernetes | cucumber | mysql | postgresql

JCDecaux

01/2015 - 03/2016

Full Stack Consultant

Plaisir

Development of mobile applications for the maintenance of the group's street furniture.

- Scrum Agility

java 8 | spring boot | mysql | apache | undertow | git | gitlab | jira | ubuntu | aws

Lotsys Filiale FDJ

04/2014 - 12/2014

Backend Consultant

Suresnes

Studies and development activities for FDJ backend

- sessions in a clustered environment
- gateway REST API developments

java 7 | spring | oracle | mercurial | confluence | bamboo | fisheye | stash | hazelcast | zookeeper

Mediametrie

04/2013 - 03/2014

Backend Consultant

Levallois-Perret

API design and development for an audience measurement system.

- research and development activities in a Scrum framework
- POC on an audience tag tagging quality measurement tool
- development of an Internet nomenclature integrator as part of a global project

java 7 | gwt 2.5 | spring framework 3.2.8 | spring data jpa 1.5.2 | spring security | cucumber | selenium | nutch 2 | htmlunit | gora

Thales communications

01/2012 - 01/2013

Full Stack Consultant

Gennevilliers

Development activities of an information and intelligence analysis platform on open source type data, centered around social network analysis and opinion analysis processing.

Development of a scalable Internet proof service

- Project within the R&D team of the THALES CenTAI Upstream Studies laboratory
- Design and development of a scalable digital evidence collection and certification service

java 7 | gwt 2.5 | spring | spring data jpa | spring social | mysql | tomcat | git | maven | mongodb

Médiapost

04/2011 - 01/2012

Full Stack Consultant

Montrouge

Study activities and development of an intranet tool for contractualisation of printed advertising products offered by LA POSTE in its establishments

- POC of a test solution via Selenium Hub
- Planning sprints, reviews, retrospectives, facilitating daily scrums
- Realization of functional and technical presentations for the team

java 5 | maven 2 | git | tomcat 5 | jenkins | sybase | jasper report | selenium | scrum | tdd

Renault / BNP Paribas / La compagnie 1818 / DGFIP / SFR

09/2004 - 03/2011

Backend Consultant

Paris

All my previous jobs.

I can provide all information on demand

> **+20 years of experience** in full-stack development and DevOps. Earlier roles include engagements with Edelia, JCDecaux, Lotsys Filiale FDJ, Mediametrie, Thales communications, Médiapost, Renault / BNP Paribas / La compagnie 1818 / DGFIP / SFR.

Studies

Control of Mobile Robots & Digital Signal Processing — 2013

Stanford / Coursera

Machine Learning — 2013

Stanford / Coursera

Signal processors and programmable logic — 2012

Paris / CNAM

Advanced microcontroller programming — 2012

Paris / CNAM

Bachelor's degree in Computer Systems and Software — 2006

Fontainebleau / IUT

Technological University Diploma in Computer Science — 2005

Fontainebleau / IUT

Scientific preparatory classes in physics 2002

Champagne-sur-Seine / Lafayette high school

French HS diploma, Science major 1999

Fontainebleau / Francois 1st high school

Projects

ByHere 2026

Guided car tour app: narrated routes with geolocated points of interest.

Realizator 2026

Web app that builds video demos automatically.

Livestreamz 2026

App that turns your phone into a camera for reliable real-time streaming.

Muti 2026

Turns body movement into a MIDI, OSC, or WebSocket controller.

Shopify assistant 2025

AI chat to create Shopify products quickly and easily.

Matière Web 2020

Co-founder and director of the web agency "Matière Web"

Learnings

LLM — Agents, RAG, prompt engineering and integration into SaaS products.

AWS Bedrock — Managed AI agent orchestration and AWS foundation models.

MCP — Tool integration protocol for language models.

LangChain — LLM chain orchestration framework and conversational agents.

OpenRAG — Open-source RAG pipeline: indexing, vector search, generation.

BMAD — AI-assisted multi-agent product scoping methodology.

Hobbies

Ableton — Music production with Ableton Live, Max4Live and Python development for MIDI controllers.

Crossovers — Basketball, game study and statistics.

Riding the hills — Mountain biking in Fontainebleau forest, Portes du Soleil and beyond.

London system or Caro-Kann — Online chess: London system, Caro-Kann defense.
