Thomery (77)

Summary

I am an agile fullstack consultant passionate about open source frontend and backend technologies. I like to develop software using cloud solutions, all in line with the Devops movement.

Equivalent Master's-level

Agile

I know how to use my multiple experiences of agility in the service of a team in order to achieve a product close to the need with a software craftsmanship philosophy.

scrum | safe | scrum master | kanban

Dev

I like to develop reusable components in a clustered environment using concepts like microservices, robustness, observability, clean code.

java | typescript | react | ddd | architec

Ops

I want to collaborate with operational teams by practicing continuous deployment and thus produce value for the company by reducing organizational friction.

docker | kubernetes | terraform | aws

Professional Experience

Solopreneur — 01/2023
Solopreneur · side projects — @home · home office

Building and shipping B2B and B2C digital products end to end—from ideation through production launch and operations.

- multi.app — control softwares with midi, osc, webhooks by motion
- City Guided — connected city guide.
- Up next: Shopify assistant, Livestreamz, Jober, Cop1, Realizator, Okascore, …

react | typescript | postgresql | llm | matière web

JPB Système — 06/2024 - 08/2025
IOT Developer — Montereau-sur-le-Jard

Full-stack development on Keyvibe, Keyprod's industrial IoT hardware product

- Keyvibe – Developed key features for industrial IoT solution
- Designed and implemented a multi-threshold production detection system on Raspberry Pi 3 & 4, leveraging Python and Node.js to monitor machine operational states in real time.
- Fully integrated Ethernet connectivity, configuring DHCPD and enabling MQTT communication to AWS IoT Core & AWS Lambda, ensuring reliable, low-latency, and scalable data transfer.

vue.js | typescript | python | aws | aws lambda | iot hub | postgresql

BlaBlaCar

10/2023 - 12/2023

Full Stack Consultant

Paris

Add new cash refund application module for operated buses

- Create a new Spring boot Java service
- Add a new Zendesk refund application tab using React

react | spring boot | postgresql | kubernetes

Smartch

05/2023 - 09/2023

Backend Consultant

Paris

Kotlin backend for a SaaS e-learning startup: Ktor, GraphQL, fast-paced remote Scrum.

- GraphQL API, Ktor, Exposed (PostgreSQL)
- Hexagonal architecture and advanced patterns
- Fully remote Scrum, CI/CD (Jira / Confluence)

kotlin | ktor | exposed | postgresql | hexagonal architecture | confluence | jira

SNCF Réseaux - DGEX Solutions

05/2022 - 02/2023

System architect

Saint-Denis

Management of the quality of deliverables and continuous improvement within the framework of the SAFe methodology.

- SAFe
- Opensource
- Railway
- Management of the transverse technical backlog

safe | rust | java 17 | typescript | node.js | python | github | kubernetes | vscode | debian

leboncoin

08/2021 - 05/2022

Backend Consultant

Paris

Participation in the full redesign of the payment system and in the design of a wallet project

- hexagonal architecture with monorepo
- event driven architecture
- production monitoring

go | kafka | postgresql | gitlab | vscode | kubernetes | docker | debian | elk | datadog

Celsius Energy

12/2020 - 08/2021

Full Stack Consultant

Clamart

End-to-end design and development of the information system: a full monitoring application for heat-pump geothermal heating in large buildings.

- contributed in designing scalable architecture for realtime dashboards to monitor IoT devices
- used Scrum team specific implementation as Agile methodology
- automated builds and deployments with unit, integration and e2e tests

typescript | python | postgresql | angular | azure | terraform | iot hub | iot edge | stream analytics | function app

RelevanC

08/2020 - 12/2020

Full Stack Consultant

Paris

Initialization of the redesign of the Coupilo multitenant couponing tool

- Hexagonal architecture
- scrum

java 11 | spring boot | postgresql | swagger | postman | jhipster | gcp

Ecocea

10/2019 - 05/2020

Devops Consultant

Paris

Transformation of the software factory for the Manutan ecommerce website.

java 8 | gitlab flow | jenkins | gitlab | websphere commerce | ubuntu | react | gradle

Edelia

04/2016 - 06/2019

Full Stack Consultant

Nanterre

Design and development of systems and applications related to the consumption of electricity, water and gas.

- Design and development of a calculation backend solution for Sowee connected thermostats
- Participation in the digital transformation project on the Devops part
- Fullstack design and development of the My Eco Service hybrid mobile application

java 8 | java 11 | docker | docker-compose | rancher | openshift | kubernetes | cucumber | mysql | postgresql

JCDecaux

01/2015 - 03/2016

Full Stack Consultant

Plaisir

Development of mobile applications for the maintenance of the group's street furniture.

- Scrum Agility

java 8 | spring boot | mysql | apache | undertow | git | gitlab | jira | ubuntu | aws

Lotsys Filiale FDJ

04/2014 - 12/2014

Backend Consultant

Suresnes

Studies and development activities for FDJ backend

- sessions in a clustered environment
- gateway REST API developments

java 7 | spring | oracle | mercurial | confluence | bamboo | fisheye | stash | hazelcast | zookeeper

Mediametrie

04/2013 - 03/2014

Backend Consultant

Levallois-Perret

API design and development for an audience measurement system.

- research and development activities in a Scrum framework
- POC on an audience tag tagging quality measurement tool
- development of an Internet nomenclature integrator as part of a global project

java 7 | gwt 2.5 | spring framework 3.2.8 | spring data jpa 1.5.2 | spring security | cucumber | selenium | nutch 2 | htmlunit | gora

Thales communications

01/2012 - 01/2013

Full Stack Consultant

Gennevilliers

Development activities of an information and intelligence analysis platform on open source type data, centered around social network analysis and opinion analysis processing.

Project within the R&D team of the CenTAI Upstream Studies laboratory of THALES

- Performance audit / Optimization of the processing chain
- Development of a scalable Internet proof service
- Participation in the integration of a loadbalancing solution for an NLP tool
- Development of GWT interfaces
- Setting up virtual machine templates

java 7 | gwt 2.5 | spring | spring data jpa | spring social | mysql | tomcat | git | maven | mongodb

Médiapost

04/2011 - 01/2012

Full Stack Consultant

Montrouge

Study activities and development of an intranet tool for contractualisation of printed advertising products offered by LA POSTE in its establishments

- POC of a test solution via Selenium Hub
- Planning sprints, reviews, retrospectives, facilitating daily scrums
- Realization of functional and technical presentations for the team

java 5 | maven 2 | git | tomcat 5 | jenkins | sybase | jasper report | selenium | scrum | tdd

Renault / BNP Paribas / La compagnie 1818 / DGFIP / SFR

09/2004 - 03/2011

Backend Consultant

Paris

All my previous jobs.

I can provide all information on demand

> **+20 years of experience** in full-stack development and DevOps. Earlier roles include engagements with Edelia, JCDecaux, Lotsys Filiale FDJ, Mediametrie, Thales communications, Médiapost, Renault / BNP Paribas / La compagnie 1818 / DGFIP / SFR.

Studies

Control of Mobile Robots & Digital Signal Processing — 2013

Stanford / Coursera

Machine Learning — 2013

Stanford / Coursera

Signal processors and programmable logic — 2012

Paris / CNAM

Advanced microcontroller programming — 2012

Paris / CNAM

Bachelor's degree in Computer Systems and Software — 2006

Fontainebleau / IUT

Technological University Diploma in Computer Science — 2005

Fontainebleau / IUT

Scientific preparatory classes in physics — 2002

Champagne-sur-Seine / Lafayette high school

French HS diploma, Science major — 1999

Fontainebleau / Francois 1st high school

Projects

ByHere — 2026

Guided car tour app: narrated routes with geolocated points of interest.

Realizator — 2026

Web app that builds video demos automatically.

Livestreamz — 2026

App that turns your phone into a camera for reliable real-time streaming.

Muti — 2026

Turns body movement into a MIDI, OSC, or WebSocket controller.

Shopify assistant — 2025

AI chat to create Shopify products quickly and easily.

Matière Web 2020

Co-founder and director of the web agency "Matière Web"

Learnings

LLM — Agents, RAG, prompt engineering and integration into SaaS products.

AWS Bedrock — Managed AI agent orchestration and AWS foundation models.

MCP — Tool integration protocol for language models.

LangChain — LLM chain orchestration framework and conversational agents.

OpenRAG — Open-source RAG pipeline: indexing, vector search, generation.

BMAD — AI-assisted multi-agent product scoping methodology.

Hobbies

Ableton — Music production with Ableton Live, Max4Live and Python development for MIDI controllers.

Crossovers — Basketball, game study and statistics.

Riding the hills — Mountain biking in Fontainebleau forest, Portes du Soleil and beyond.

London system or Caro-Kann — Online chess: London system, Caro-Kann defense.
